AGI Publishes 43rd Edition of the *Directory of Geoscience Departments*

ALEXANDRIA, VA — The latest edition of the *Directory of Geoscience Departments* (DGD) — the definitive source for information about college and university geoscience departments in the United States and in 51 countries — has just been published by the American Geological Institute (AGI).

The *Directory of Geoscience Departments*, 43rd Edition, provides a state-sorted listing of 1,169 geoscience departments, including museums, research departments and institutes and their faculty and staff. Of the 903 U.S. geoscience departments listed, 879 grant degrees. This edition also lists 266 non-U.S. departments in 51 countries. In addition to information about geoscience departments, their faculty, and the faculty specialties, the DGD includes listings of U.S. state geological surveys, field-camp information, and faculty contact information. Other valuable features include departments that are also listed in AGI's comprehensive Guide to Geoscience Departments; the most recent enrollments and degrees granted; and an expanded listing of federal agencies that employ or are of interest to geoscientists.

Published in soft cover (6" x 9"), the 584-page *Directory of Geoscience Departments*, 43rd Edition (ISBN 0-922152-73-X; ISSN 0364-7811), is available from AGI and can be ordered online from AGI Publications at www.agiweb.org/pubs, by phone at (703) 379-2480, or through Amazon.com. The list price is \$40.00; members of AGI member societies are eligible to purchase one copy at 20 percent off list price.

The American Geological Institute is a nonprofit federation of 42 scientific and professional associations that represent more than 120,000 geologists, geophysicists, and other earth scientists. Founded in 1948, AGI provides information services to geoscientists, serves as a voice of shared interests in our profession, plays a major role in strengthening geoscience education, and strives to increase public awareness of the vital role the geosciences play in mankind's use of resources and interaction with the environment. More information about AGI can be found at <http://www.agiweb.org>. The Institute also provides a public-outreach web site, <http://www.earthscienceworld.org>.
