AGI Offers Bulk Discount on *The Geoscience Handbook*

Alexandria, VA -- The American Geological Institute (AGI) is offering a special bulk discount on orders of five or more copies of the bestselling publication, *The Geoscience Handbook: AGI Data Sheets 4th Edition* (ISBN 0-922152-75-6).

Originally priced at \$49.95, customers that order five or more copies of *The Geoscience Handbook* through AGI will receive a 25 percent discount. Standard shipping and handling fees apply. The bulk discount is available through August 31, 2007.

This compilation of geologic information includes references for key geological concepts and short tutorials useful for all professionals and students needing geoscience information quickly in the field, office or lab. *The Geoscience Handbook* covers diverse subjects ranging from geophysics to geologic map symbols to GPS usage and everything in between. The full-color *Geoscience Handbook* is now in a larger, easier to read format than earlier editions but remains very portable for use in the field or office. In addition, the laminated cover helps protect the book when used under field conditions.

Ideal for field camp students and other geoscience courses, students can quickly and easily look up items such as mapping symbols while they work in the field on their projects. Handy in every office or lab as a quick reference, *The Geoscience Handbook*, enables researchers and earth science novices alike to decipher terms and concepts in all areas of the geosciences.

For more information on *The Geoscience Handbook* and other AGI publications, go to <http://www.agiweb.org/pubs/>. To take part in this special offer, contact the AGI publications department at pubs@agiweb.org.

The American Geological Institute is a nonprofit federation of 44 geoscientific and professional associations that represents more than 120,000 geologists, geophysicists, and other earth scientists. Founded in 1948, AGI provides information services to geoscientists, serves as a voice of shared interests in the profession, plays a major role in strengthening geoscience education, and strives to increase public awareness of the vital role the geosciences play in society's use of resources and interaction with the environment.
